"Developing Capacity Towards Export"

TEA TALK

**"FINANCING SOLUTIONS FOR SERVICE EXPORTS" BY
EXIM BANK**

Securing financing for service exports is one of the frequently identified problems that hamper exporters in undertaking international service contracts successfully. For companies that need help covering expenses directly related to an export or indirect export, there are a few working capital financing and guarantee schemes available. In addition, asset financing to accommodate performance of service contracts and acquisition of technology for products/services for the global market are also afforded by EXIM Bank. Insurance protection covering commercial and political risks associated with non-payment by overseas principals or contract awarders for service or constructional works contracts can be purchased from EXIM Bank to give exporters financial security in good and bad times.
